

Brainstorm & idea prioritization

2-8 people recommended

Brainstorm

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

How might we analyze vehicle performance using

Sneha Varshini		Francis Jasper Terence		
Predicting the performance of the car	Collecting the driving data.	UI for good interaction	studying the relation between driving behaviour and fuel consumption	
Identify the potential bottlenecks of the problem.	Submit Yearly Report	Introduce Strategies to improve	Cumulative Graphical Representation	

Carthika		Aswath Jude		
analyzing the horn system in the vehicle	efficient use of seatbelt system.	Posture retaining deduction	vehicle navigating traffic with machine learning and vision.	
Building vehicle and sub-systems performance for guiding future product design	discovering driver assistance and driver risk assessment systems.	improving customer experience through conversational interfaces	Access to the disabled and people with reduced mobility.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

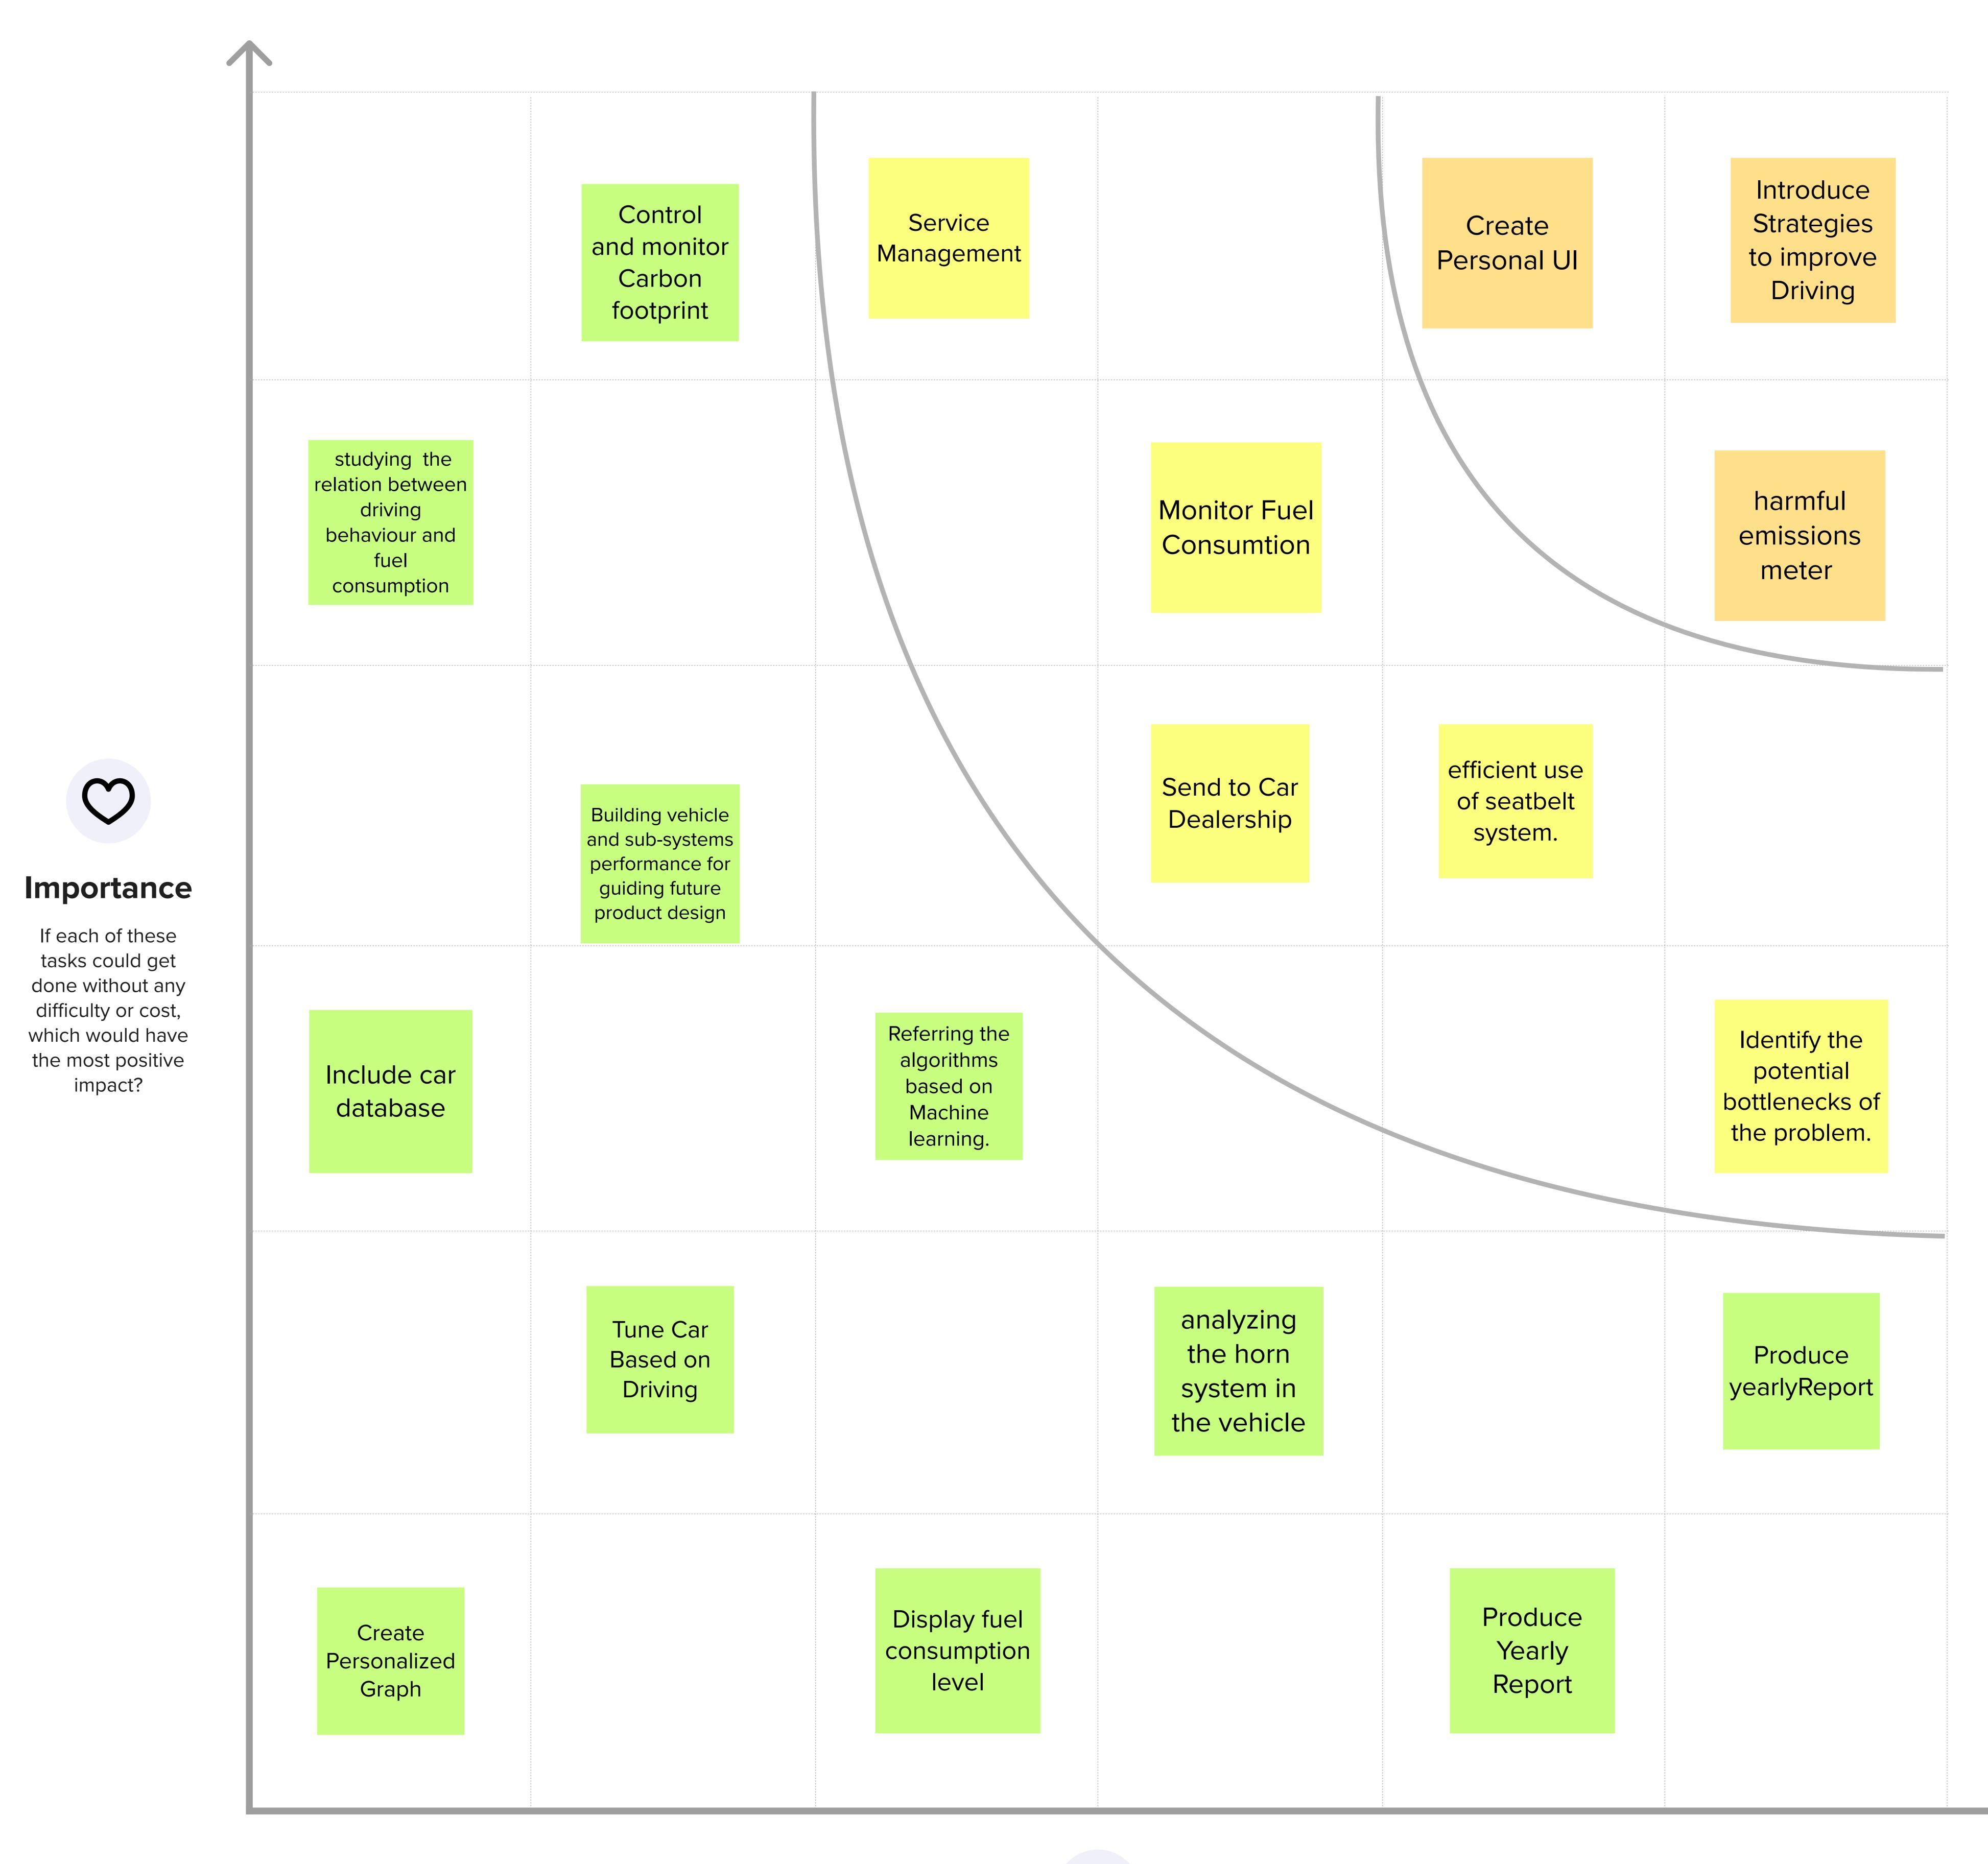

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
